

Our Truck Mounted Bundle Extractor is completely self-sufficient. It travel at highway speeds mounted on a cab over truck eliminating transportation cost. Its capabilities once onsite enables out extractor to pull, transport to a cleaning location and unload the bundle without the assistance of the other trucks or cranes.

The main advantages of this machine are the pulling and reinstalling bundles can be faster, easier, safer and cheaper.

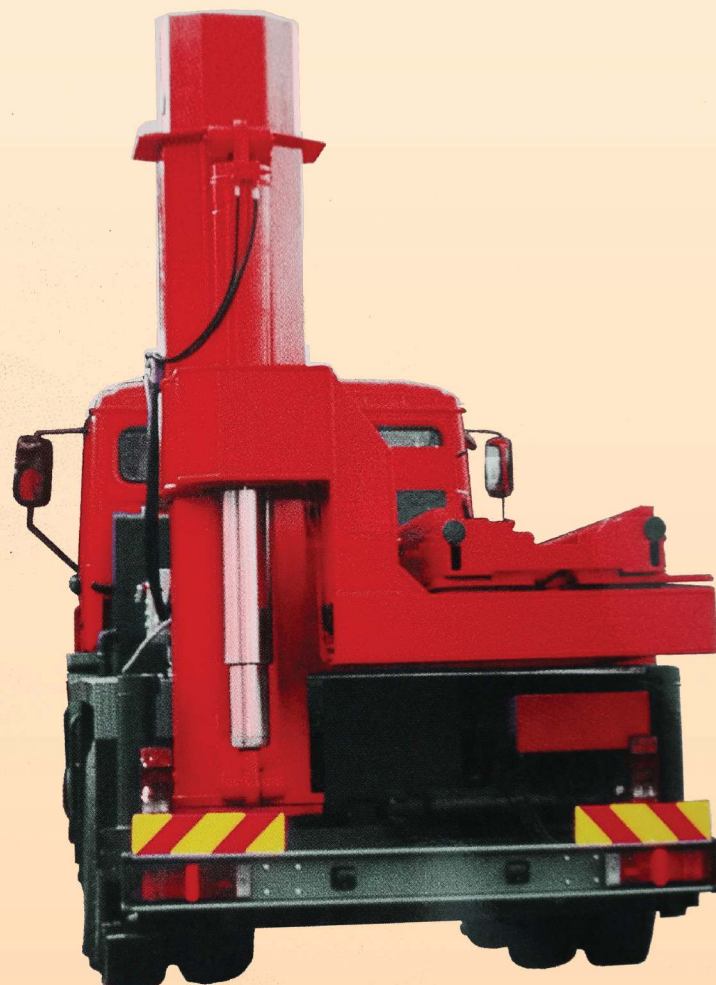

TECHNICAL DATA

<i>Maximum Working Height</i>	7000 mm./23 feet
<i>Minimum Working Height</i>	610 mm./2 feet
<i>Maximum Bundle Diameter</i>	2000 mm./6,56 feet
<i>Maximum Bundle Weight (at minimum height of extraction)</i>	25000 kg./55,080 lb.
<i>Maximum Bundle Weight (at maximum height of extraction)</i>	22000 kg./33,050 lb.
<i>Maximum Pulling Force</i>	62000 kg./88,130 lb.
<i>Winch Pulling Speed</i>	2800 mm./min 91,8 feet/min

Idrokid srl, leader in the field of industrial maintenance equipments, proudly presents state of the art technology for heat exchangers maintenance!

The full line of extractor now included our aerial mod. Super clever, Super Idrokid and Mega Idrokid, plus our new truck mounted mod IKTRUCK 22, all offered to ensure that your bundles will be handled safely and with maximum efficiency
